

From Vision to Reality: Our Remote Architects' Astonishing Achievement!

Check out this amazing work of our 'Remote Architects' in the latest project! Our client envisioned a cool, hip residence - with simple, airy interior arrangements, big windows, and a chill swimming pool deck that connects to each room. To give it that modern edge, our architects added a stunning curved metal roof with an incredible skylight that catches all of the natural light. The all-white stucco exterior is eye-catching with tons of fun decks. It's pure luxury inside and out. We made our client's basic model photos come alive and turned them into something beyond their expectation using Autocad, Sketchup & Lumion.

Meet our Hydration Heros: Hema Masi & Dilip Kaka

Meet Hema Masi and Dilip Kaka, our hydration superheroes! During this hot summer season, they make sure we stay hydrated, reminding us how important it is to keep ourselves refreshed all day long. They make all team members of ISP stay hydrated by consistently refilling the water bottles. Their commitment to our well-being is truly commendable, and we are grateful for their constant efforts in ensuring our hydration needs are met.

Pajama Day in Office Brought Ultimate Comfort

We recently had a delightful day at the office as we celebrated 'Pajama Day'. Everyone ditched their usual office attire and embraced the comfort of pajamas. The office was filled with colorful and cozy outfits, creating a relaxed atmosphere. We got a refreshing break from the typical work routine. This event not only added a touch of excitement to our work environment but also emphasized the importance of relaxation and well-being. We look forward to create more lasting memories like this.

World's Longest Ropeway to Open Soon in Kedarnath, India

The Kedarnath (one of the twelve jyotirlingas of Lord Shiva) Ropeway, the world's longest, is being constructed at an altitude of 11,750 feet. Kedarnath is one of India's most challenging treks, tests the endurance of pilgrims and adventurers alike. Spanning 14 kilometers from Gaurikund, the journey presents rugged terrains, dense forests, and steep slopes, demanding physical and mental resilience. However, exciting news awaits. With an estimated cost of 1 billion USD, it emphasizes accessibility and safety for devotees. Operating for eight hours daily during the yatra season, it will transport up to 2000 devotees per hour, reducing travel time and offering breathtaking views. This remarkable project combines adventure, spirituality, and innovation, transforming the pilgrimage experience.
