

APPLE PIE & CHAI

Featured Project

Project Type: Residential
Location: Birmingham, USA
Software Used: 3ds Max, Lumion

With ISP's remarkable Home Design Modification Services, this residence, nestled in the heart of Birmingham, went through a transformative journey. The project aimed at elevating the aesthetics and functionality of the residence, utilizing software such as 3ds Max and Lumion for exterior visualization.

From the client's submission of the desired modifications to the completion of the project, the process had been seamless with ISP. We promptly drafted a comprehensive plan and scheduled a collaborative meeting to refine the client's vision. With plans shared and approved, the client could rest assured as our skilled team meticulously executed the modifications over 3-4 weeks.

With ISP's commitment to excellent service and customer satisfaction, we could bring style and practicality under the same roof, indeed, while making the client's dream come true.
