

APPLE PIE & CHAI

Project of the Month

Project Type: Commercial
Location: Florida, USA
Software Used: Lumion & Sketchup

From architects to engineers, ISP's team of professionals made a revolutionary digital change to a museum in Florida, USA. Using cutting-edge software like Lumion and SketchUp, architects created a 3D walkthrough implementing the changes requested by the client.

The client requested a multi-dimensional approach to see how the contemporary design of the historical building would appear. Before approving physical changes in the design, they wanted to know every minute detail associated with the renovation. The client wanted a virtual walkthrough of the finished look of the APHOF before they could commit to the physical change.

The process started with the client providing a SketchUp model. The architects created a comprehensive draft rendering based on the model and conducted meetings to refine the design further. The idea was to ensure the client and ISP team were on the same page.

With the client's design approval, the project was divided among small groups to ensure on-time delivery. Creating minute details like vegetation, models, wind effects, etc., demands expertise. The most intricate part of the rendering process was merging the audio with the walkthrough.

Despite the project's complexity, ISP completed it within three weeks with regular feedback from the client.

A Peek into ISP Moments

At ISP, we take mental health seriously. To ensure our employees' overall well-being, our L&D team organized a Mental Health Week program led by our psychologist, Duraiya Bengali, in collaboration with the Mental Health Foundation. We also organized a Beach Day to make the workplace fun and stress-free. Our enthusiastic team members actively participated in the Mother's Day contest we arranged.

Architectural Awe in India

Fatehpur Sikri:

Situated in Uttar Pradesh, Fatehpur Sikri is the only rhombic city in India and was one of the first planned cities established by the Mughals. It is a unique ensemble of indigenous, Islamic, and Persian-style buildings built between 1571 and 1585. UNESCO declared the city a World Heritage Site in 1986 because of its architectural marvel.
