

## Project of the Month

**Project Type:** Residential  
**Location:** Ohio  
**Software Used:** Revit, Lumion, Bluebeam Takeoff, On-screen Takeoff, and Microsoft Office

Our architectural design support team, known for their efficiency and dedication, successfully completed a residential project within an intriguing 7-day deadline. This involved quantity and material takeoff with project construction estimation, all done meticulously since we received the drawings from the client.

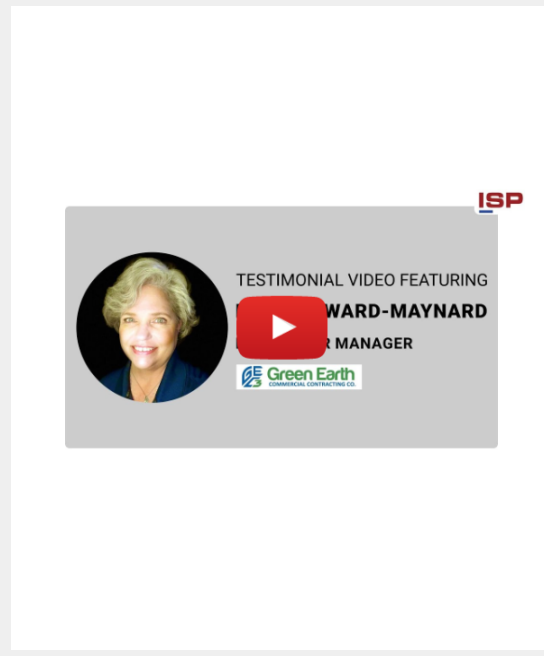

To complete the project within such a short period, we conducted price research based on the current market and calculated privileged labor costs. Using Bluebeam Takeoff, our architectural team created a competitive estimate for bidding, including overheads and taxes.

Each challenge is a new opportunity for us. While finding the best prices was challenging, we demonstrated our problem-solving skills by finding accurate pricing using multiple websites and trader connections. We also cooperated closely with the logistics team and suppliers to ensure early delivery while maintaining compliance.

Our in-depth knowledge of construction estimation, coupled with our dedication to delivering projects on time and to the highest standards of quality, played a pivotal role in ensuring that our client secured the winning bid.

## Industry Insights

Trimble recently announced the launch of its new asset lifecycle management software suite called Trimble Unity. This suite integrates several of Trimble's existing solutions into a comprehensive package designed to efficiently plan, design, build, operate, and maintain assets. Trimble Unity reduces the total cost of asset ownership by up to 40%

## A Peek into ISP Moments

We were delighted to welcome Mitesh Smart, our esteemed founder and CEO, on a trip to all four India locations, Surat, Kolkata, Nashik, and Ahmedabad!

Employees across departments interacted directly with Mitesh as he shared his vision for the company's future. His infectious enthusiasm motivated and energized us, instilling a sense of belonging and purpose.

His presence boosted the morale of ISPians, and we are eager to move forward and support each other as we build an even stronger team.

We also celebrated our second Fun Friday this month, which was a smashing hit! From cutting cakes to playing Bingo, everyone had a blast participating in the activities.

## Architectural Awe of India

The Rajkumari Ratnavati Girls' School in Rajasthan exemplifies modern, innovative architectural design in the harsh North Indian desert. It was designed by Diana Kellogg Architects and brought to life by CITTA, a non-profit empowering remote community. The state-of-the-art design keeps the school cool and ventilated, using traditional elements like the "Jali" design.
